point

1.

Are you using GraphLab Create? Please make sure that

1. You are using version 1.8.3 of GraphLab Create. Verify the version of GraphLab Create by running

```
graphlab.version
```

inside the notebook. If your GraphLab version is incorrect, see this post (<https://www.coursera.org/learn/ml-classification/supplement/LgZ3I/installing-correct-version-of-graphlab-create>) to install version 1.8.3. **This assignment is not guaranteed to work with other versions of GraphLab Create.**

2. You are using the IPython notebook named module-8-boosting-assignment-1-blank.ipynb obtained from the associated reading.

This question is ungraded. Check one of the three options to confirm.

- ☒ I confirm that I am using the right version of GraphLab Create and the right IPython notebook.
- ☐ I am using scikit-learn.
- ☐ I am using tools other than GraphLab or scikit-learn, and I understand that I may not be able to complete some of the quiz questions.

point

2.

What percentage of the predictions on sample_validation_data did model_5 get correct?

- ☐ 25%
- ☐ 50%
- ☒ 75%
- ☐ 100%
-

1
point

3.

According to **model_5**, which loan is the least likely to be a safe loan?

- ☐ First
- ☐ Second
- ☒ Third
- ☐ Fourth
-

1
point

4. What is the number of false positives on the validation data?

1618

1
point

5.

Using the same costs of the false positives and false negatives, what is the cost of the mistakes made by the boosted tree model (model_5) as evaluated on the validation_set?

46990000

1
point

6.
What grades are the top 5 loans?

- ☒ A
 - ☐ B
 - ☐ C
 - ☐ D
 - ☐ E
-

1
point

7.
Which model has the best accuracy on the validation_data?

- ☐ model_10
 - ☐ model_50
 - ☒ model_100
 - ☐ model_200
 - ☐ model_500
-

1
point

8.

Is it always true that the model with the most trees will perform best on the test/validation set?

- ☐ Yes, a model with more trees will ALWAYS perform better on the test/validation set.
- ☒ No, a model with more trees does not always perform better on the test/validation set.
-

1
point

9.

Does the training error reduce as the number of trees increases?

- ☒ Yes
- ☐ No
-

1
point

10.

Is it always true that the test/validation error will reduce as the number of trees increases?

- ☐ Yes, it is ALWAYS true that the test/validation error will reduce as the number of trees increases.
- ☒ No, the test/validation error will not necessarily always reduce as the number of trees increases.
